Sandoz Sitagliptin-Metformin (sitagliptin/metformin hydrochloride) is indicated as an adjunct to diet and exercise to improve glycemic control in adult patients with type 2 diabetes mellitus inadequately controlled on metformin or in patients already being treated with the combination of sitagliptin and metformin.
Sandoz Sitagliptin-Metformin is indicated in combination with:

- a sulfonylurea,
- premixed or long/intermediate acting insulin,
- pioglitazone in adult patients

To improve glycemic control when diet and exercise, and dual therapy do not provide adequate glycemic control.
Please consult Product Monograph available at sandoz.ca/en/Generics or obtain a copy by calling Sandoz Medical Information at 1-800-343-8839 ext. 4636.
