Sandoz Sitagliptin (sitagliptin) is indicated for use as an adjunct to diet and exercise to improve glycemic control in adult patients with type 2 diabetes mellitus for whom metformin is inappropriate due to contraindications or intolerance.

Sandoz Sitagliptin is indicated in combination with:

- metformin,
- metformin and a sulfonylurea,
- pioglitazone (alone or with metformin),
- premixed or long/intermediate acting insulin (alone or with metformin)

when the existing therapy, along with diet and exercise, does not provide adequate glycemic control

Please consult Product Monograph available at sandoz.ca/en/Generics or obtain a copy by calling Sandoz Medical Information at 1-800-343-8839 ext. 4636.
